full octave
Dive Bombs!

The MORPHEUS Bomber pedal – do deep dive bombs and full chordal whammy bar string bending with the Bomber pedal– and your guitar never goes out of tune!

This is the hottest pitch-shifting technology in years to hit the stompbox market.

The Bomber pedal utilizes propriety polyphonic pitch shifting algorithms to bend

ALL of your strings with stunning accuracy -- replicating all of the stunning effects produced by mechanical tremolos as well as

some new and exciting guitar tricks.

The Bomber pedal's innovative design strikes a perfect balance between control and ease of use.

No more bending over to change pedal settings. Select a range from two octaves up, to five octaves Down by simply using your foot.
