

# HYPERSTATION SERIES

*Two-tier Portable Laptop Stand with Angle- and Depth-adjustable Laptop Support Arms and Height-adjustable Second Tier for Hard Drives, USB Hubs, and Other Computer Accessories*

### Portable Production

Hyperstation is designed to go wherever your music takes you. While sturdy enough to safely hold your laptop and other small electronics, it folds up as one piece and fits in a backpack!

### Professional Build

Don't let the sleek styling fool you, this is not a flimsy, plastic stand. Hyperstation is constructed from die-cast aluminum making it incredibly sturdy while surprisingly light. The automotive-grade anodized finish is stunning and scratch resistant.

### Secure and Sturdy

The laptop support arms are angle- and depth adjustable. You can place your laptop at whatever angle suits your needs and then secure it in place with the telescoping non-marring arm stops.

### Second Tier

The modern musician and DJ artist carries additional hard drives, MP3 players, USB hubs, and other computer accessories with them to each and every gig. Hyperstation has you covered! The second tier is height adjustable and fitted with ports for venting and cables.
