

## ELiTE-CFS™ (Custom Fabric System)

Ultimate Sound. Ultimate Aesthetics.

### Why Custom Fabric System?

The interior design of your venue or sanctuary has a tremendous impact on the overall sound quality in the room. With that in mind, **Auralex** offers **ELiTE-CFS**. Each installation is custom engineered from the ground up to exceed your acoustic and aesthetic requirements.

### CFS Features:

- A patented retention channel system measured and installed on site by **Auralex** trained professionals for an uncompromising fit
- Custom Engineered components that correct acoustical anomalies which would otherwise distort the sound
- Choose from hundreds of aesthetically pleasing specialized acoustical fabrics
- Professional project management and custom installation services, including consultation with other contractors
- All system components meet Class A fire code specifications

ELiTE-CFS™  
Custom Fabric System

### Superior Results

The overall result of an installed **CFS** is a room that looks and sounds great, providing an exceptional listening experience for years to come. The acoustical elements of your system will include the appropriate combination of absorption, diffusion, reflection, and bass trapping (features not available by most other systems) all of which are hidden behind the elegant fabric facing.

### How do I get started?

The first step is to visit our website at [www.Auralex.com](http://www.Auralex.com). Here you can find answers to technical questions, examples of **CFS** installations, and contact our engineering team.

Next, simply fill out the enclosed personalized room analysis form with as much detail as possible, and we'll help you figure out exactly what your room needs.

**ELiTE-Custom Fabric System** – for the ultimate blend of aesthetic and sonic perfection.
