

ELiTE™ Pro Systems

Auralex ELiTE Pro Systems are all-inclusive acoustical treatment solutions designed to provide everything needed to address your sound control requirements.

Components include B22 ProPanels™, ELiTE™ CT45™ for low-end absorption and the ProFusor™ for diffusion in larger installations.

All of the components carry a Class A fire rating and are fabric-wrapped for an elegant aesthetic appeal.

Depending on which system you choose, your room will have 25% to 50% coverage of the walls and ceiling.

This is the appropriate range for accuracy in a critical listening environment.

ELiTE™ B22 ProPanels™

ELiTE™ ProFusors™

ELiTE™ CT45™ Bass Traps

ELiTE™ Pro Systems EPS-112T

The EPS-112T provides a total of 112 square feet of coverage and is designed for smaller rooms where diffusion is typically not required due to the limited distance between the wall surfaces and your listening position. The EPS-112T offers outstanding acoustics and great looks for small- to medium-sized rooms not requiring diffusion.

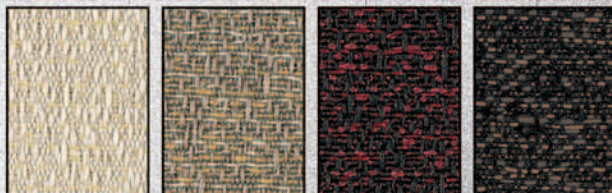

EPS-112T™ - EPS112T(color/color)			
Contents:	Qty:	Coverage:	Fabric Choices:
1" B22s	20	80 ft²	Sandstone, Tiger Eye, Garnet or Obsidian
2" CT45s	4	32 ft²	Sandstone or Obsidian
Wall mounting hardware included		Sugg. Sell \$1,999.00	

ELiTE™ Pro Systems EPS-168T

The EPS-168T System provides a total of 168 square feet of coverage and includes all of the necessary components to decorate and accurately treat small- to medium-sized rooms. The EPS-168T includes ProFusors to give the room a spatial liveliness, thus imparting a sense of openness to the sound.
