

# Fiber Optics

Standard lead time for production of Fiber Optic Curtain is 4 – 6 weeks. Pricing may vary based on length of curtain runs, number of panels needed, number of illuminators needed, length of umbilical, and complexity of installation.

All Fiber Optic quotes are an estimate only and may be adjusted once the finished design is agreed upon.

**Auralex** specifies and installs a 15 oz. Sonolite Fiber Optic Starfield. The Starfield consists of one layer of certified inherently fire retardant black encore velour that is stretched between permanently installed retention channels by certified Auralex professionals. Jacketed bundles of multiple sized fibers are permanently secured in either random or specified patterns throughout the fabric. *(Other colors and fabrics are available).*

## Illuminator Choices:

*All options have twinkle or color capabilities*

- Standard 120VAC, 75W or 100W MR16
  - Lamp life 4,000 hrs. or 2,000 hrs.
- Lowerpower LED 100-220V switching power supply, 5W LED
  - Lamp life 50,000 hrs.
- Hi-intensity Metal Halide 120V, 150W
  - Lamp life 10,000 hrs.
