

The GRAMMA (*Gig and Recording, Amp and Monitor, Modulation Attenuator*) is an incredibly effective patented device that's used to float an amp or loudspeaker and yields nearly total acoustic isolation, resulting in a purity of tone that has to be heard to be believed!

Built on the success of GRAMMA, the Great GRAMMA is almost 30% bigger to float large speaker cabinets. Now 4x12's, 15" or 18" speaker cabinets will benefit from the awesome Great GRAMMA.

"If you're baffled by your live or studio sound, this could be the smartest \$\$ you'll ever spend".

Only Great GRAMMA™ can handle the big rigs and deliver a purity of tone that has to be heard to be believed!

Guitarist Magazine

GRAMMA comes complete with a carrying handle, road-ready carpet, Platfoam feet and Studiofoam Wedges (*underneath*).

"We have been introducing GRAMMAS to a lot of soundpeople during our tour who have been blown away by how they (GRAMMAS) isolate the guitar and bass on a hollow stage. We take our GRAMMAS everywhere!"

Joe Bonamassa
