

Performance ProBanners™ and ProBaffles™

Auralex ProBanners and **ProBaffles** are some of the most economical ways to acoustically treat the ceiling in a large room. Great for reducing reverberation and reflection in gymnasiums, arenas, sanctuaries, restaurants, and clubs – these absorbent panels can be either hung vertically along ceiling rafters or horizontally across them. These are available in PVC, nylon, or fabric finishes. Fabric choices include the hundreds of options available for CFS and ProPanels.

Benefits:

- Covering holds up well in harsh environments
- Quick and easy installation
- Class A Flame Retardant
- Common color options to blend in well with most environments
- Auralex Application Specialists and Engineers assistance

Sizes: **ProBanners** can be any size up to 4'x25' to fit across your ceiling rafters. Most **ProBaffles** are 2'x4', but can also be made to spec. Production lead time on these items is 3-5 weeks.

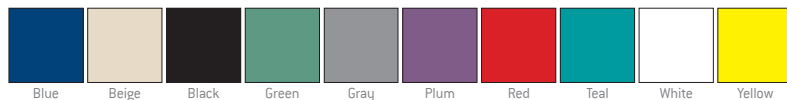

Acoustical Performance (in accordance with ASTM C423)

ProBanner	Octave Band Center Frequency (Hz)						NRC
	125	250	500	1000	2000	4000	
2" thick	1.09	0.97	0.92	1.05	1.00	1.11	1.00
4" thick	1.31	1.11	1.14	1.17	1.15	1.19	1.15

ProBaffles	Octave Band Center Frequency (Hz)						Sabins/ sq in
	125	250	500	1000	2000	4000	
Fabric Baffles	0.00	0.55	1.73	2.76	2.91	2.86	2.00
PVC Baffles	0.40	0.74	1.42	1.73	1.60	1.14	1.37

Class A Fire Rated (in accordance with ASTM E-84)
 Flame Spread = 20 (maximum)
 Smoke Developed = 50 (maximum)
