

## TEMP•Tabs™ Studiofoam Mounting Kit

Congratulations on your decision to protect your investment!

TEMP•Tabs are a temporary Studiofoam mounting solution designed for easy installation and maximum flexibility. You no longer need to commit to permanently placing your acoustic treatments or cleaning adhesive residue and chunks of your investment off of your walls.

Included in your TEMP•Tabs kit, you should receive the following components:

TEMP•Tabs - TTAB-KIT	
Qty:	72 - TEMP•Tabs
Coverage:	up to 96 sq. ft. per kit
Dimensions:	1½" x 3" tabs
Accessories:	72 sets of Velcoins®
Adhesive:	1 - Tubetak Pro

So many times, optimum placement of acoustic treatments boil down to critical listening to the environment and tweaking the placement of the treatments until the frequency response is just right. TEMP•Tabs afford you that opportunity.

### Installation tips:

-Using a caulking gun, apply the Tubetak Pro adhesive to one side of six (6) TEMP•Tabs (enough to mount one sheet of Studiofoam at a time). For best support of the panel, TEMP•Tabs should be installed "portrait" style (vertically) as opposed to "landscape" style (horizontally) according to how you intend to place the panel on your wall.

-A good rule of thumb for placement of your TEMP•Tabs is to use the narrow dimension (1½") of a TEMP•Tab as a guide to help you appropriately space the tabs in from the edge of the Studiofoam panel, placing six (6) TEMP•Tabs per panel. A minimum of three (3) TEMP•Tabs should be used on 2'x2' panels (included in the Roominator Performance Series kits) and two (2) TEMP•Tabs per 1'x1' panels such as Wedgies or DST 112s and DST 114s.

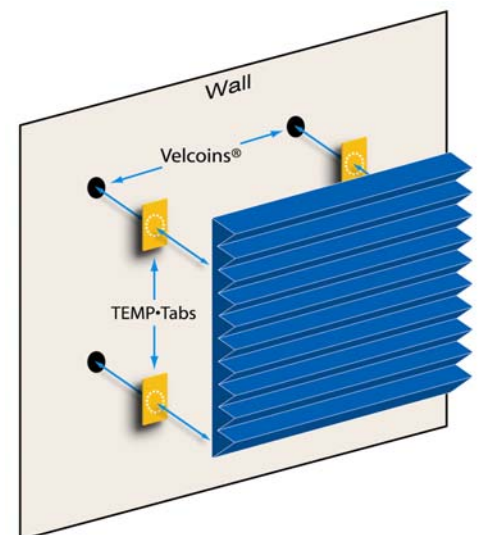

-Repeat above process for the remainder of your box quantity of Studiofoam.

-Allow the adhesive bond a minimum of 12 hours to set.

-Next, join both sides of each VelCoin pair prior to placing the VelCoin on the TEMP•Tab.

-Simply place the entire panel assembly (PRESSING FIRMLY) against your wall.

-If for some reason the adhesive side of the VelCoin that sticks to the wall should fail in the long term, an easy way to reattach that VelCoin to the wall is to simply staple through it to secure it, then rejoin it with its corresponding VelCoin.

*2'x2' panel using 4 TEMP•Tabs*

Happy room tuning!
