

Fostex®

FM-3 Professional Field Mixer

The rugged FM-3 Portable Mixer is equipped with balanced 3ch input and 2ch main output each featuring individual high quality signal transformers, plus it offers a wide variety of sub outputs. Housed in a solid aluminum body which makes it ideal for use in a field mixing environment, the FM-3 also features a newly developed Organic EL display offering excellent clarity.

- Balanced 3ch input and 2ch main outputs with extremely high quality signal transformers.
- Light but robust aluminum body construction with exclusively machined large aluminum fader knobs.
- Metal axis fader pots using conductive plastic to extend its quality and durability.
- Highly visible Organic EL display with high resolution metering to offer both VU and Peak level with selectable Stereo and Mono indication.
- Master, Trim and HPF knobs with pop up mechanism to avoid inadvertent operations.
- Mixer's parameter setting status (mic/line, phantom on/off, etc) can be seen on the display.
- Wealth of outputs such as Sub output, Tape output, 2 x Phones out as well as AUX output with channel select.
- Switchable level settings at +4/0/ -20/ -60 on Main and Sub outputs.
- Phones outs accept standard and mini plugs on each socket with multiple source and PFL monitoring.
- A dedicated monitor return input to check the audio from VTR or Camera feeds.
- AUX input can be merged to the Stereo bus for cascade connection.
- Analog limiter with the threshold and ratio adjustments.
- Internal 8 x AA batteries or DC12-24V external powering. More than 7 hours operation with alkaline batteries (phantom off). The remaining battery capacity can be displayed on both the display and LED indicator.
- DC output with Hirose connector for powering a wireless receiver.
- Optional EX-BP2 battery back available
