

# NOTION3

REDEFINING NOTATION SOFTWARE

NOTION3 is the first product to bridge the gap between notation and an audio application, allowing you to not only create and listen, but to perform live or produce music with stunning results.

## **Easy to look at. Easier to Use.**

Sleek, intuitive interface and workflow allowing you to use notation, guitar tab, or MIDI devices to craft music of any style, be it orchestral, jazz, or rock.

## **Over 10GB of Improved and Enhanced Samples**

Exclusively featuring the London Symphony Orchestra as well as popular instruments such as guitar, bass, and drums recorded by legendary artists at top studios around the world.

## **SequencerStaff™**

A feature unique to NOTION3. Record MIDI input on a standard notation staff while retaining all the MIDI data including modulations, bends and dynamics. Keep in SequencerStaff view or convert to notation instantly.

## **Professional Audio Mixer**

Complete with buses, inserts, sends, multiple direct channel outs and VST effects.

## **Expanded Compatibility**

Finally, a notation product with full ReWire integration that supports both host and slave options. Packed with digital audio workstation compatibility features, NOTION3 effortlessly integrates third-party VSTi libraries, MIDI-out instruments, audio files, and VST effects.

## **Live Performance Features**

The only notation product with advanced real-time tempo control that includes vamps, repeats, score navigation and other features allowing it to be used like a musical instrument with accompaniment, rehearsal, or professional live performance.
