

PROGRESSION™

MUSIC SOFTWARE FOR GUITAR

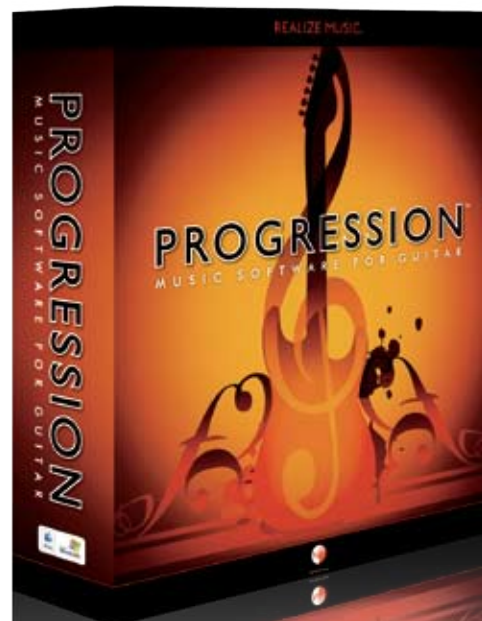

PROGRESSION is a powerful guitar tab and playback application revolutionizing the way guitar players create music.

SIMPLY SOUNDS AMAZING

PROGRESSION features thousands of real electric and acoustic guitar samples from Neil Zaza, electric bass samples and drum samples from Grammy® Award winners Victor and Roy "FutureMan" Wooten. Also included are grand piano, upright bass, clavinet, and electric piano – all in professional quality audio. PROGRESSION comes bundled with guitar and bass amp simulation and VST plug-in hosting capability that enables the use of external effects and amp modelers. And with the built-in mixer, you have complete control over the rest of the mix as well.

SOUNDS AMAZINGLY SIMPLE

PROGRESSION stands as a powerful, yet easy-to-use guitar application. You can quickly enter guitar tab or notes on a staff with your keyboard and mouse – or you can play your music on a MIDI guitar or MIDI keyboard and PROGRESSION scores your performance for you. Make changes to the tab and the notes on the staff change accordingly, and vice-versa. Capture new song ideas in real time and PROGRESSION plays them back instantly. Now you can share your ideas with others by simply sending them an audio or PROGRESSION file.

COMPLETE CONTROL WITH THE CLICK OF A MOUSE

PROGRESSION also helps you maximize your practice time by enabling you to hear the guitar parts, so you can learn your favorite songs and solos much faster. Want to change the key or the tempo? No Problem! With PROGRESSION you have the power to change the tempo and key to suit your needs, instantly.

Beef up the tracks with other instruments so you can play with a band in the privacy of your practice space. And with our audio exporting and printing features you can create your own guitar tabs, lead sheets, and standard sheet music - complete with an audio track of your work.

Simply put, PROGRESSION sounds amazing.

REALIZE MUSIC.
